

energy focus™

Purpose

To provide the most sustainable and **energy efficient LED lighting** technologies and solutions available in the marketplace, for **ruggedised military environments** as well as civilian business and domestic applications.

Effectiveness

Saved more than five million gallons of fuel and 300,000 man-hours in lighting maintenance annually since 2007 for the US Navy

Guaranteed to function in any environment including extreme cold, heat and hazardous locations

Credibility

First UL-certified "**low-flicker**" LED products on the U.S. market.

Product will withstand **extreme conditions** of rocket testing for NASA.

Customers include:

- GSA: Health, Hospitality, Education, Residential
- NASA
- US Navy
- DARPA
